

Dear _____,

This little craft kit contains everything you need to **make your own:**

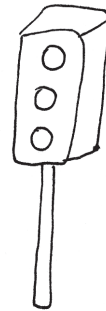

MATCH BOX CARS

Use the materials provided to make an impressive fleet of small cars.

Here's how to make them:

- 1 Glue one of the small pieces of match box to an upturned match box tray.
- 2 Colour the chassis using a permanent marker.
- 3 Glue on button wheels.
- 4 Scrunch two small balls of aluminium foil to make headlights and glue them on.

Repeat the same process until you have run out of match boxes! If you're feeling creative, try making a truck or a utility vehicle.

I hope you have fun!

Love, from
