

Dear _____,

This little craft kit contains everything you need to **make your own:**

PET ROCK FAMILY

Use the materials provided to make a family of pet rocks with heaps of personality!

Here's how to make them:

- 1 Select some googly eyes and glue them on the rocks. You can give each rock its own distinct personality by gluing the eyes differently.
- 2 Choose some hair and glue it on too. Give each of your rocks a different hairstyle, or leave them bald if you prefer that.
- 3 Make a special box for your pet rocks to live in. First of all, glue the large rectangular piece of paper to the outside of the matchbox, then put the small rectangle piece of felt inside.

When you're finished your super cute rocks can hang out together and, ummm, do whatever it is that rocks do. Maybe they could start a rock band?

I hope you have fun making them!

Love, from
